

Summer Student
Engineering Assistant
Community Services

If you are a highly energetic, motivated post-secondary Engineering student that enjoys being part of a team and are looking for a summer job, this could be your opportunity!

Responsibilities may include:

- Develop preventive basic care maintenance procedures
- Develop facility operating and fire plan procedures
- Develop equipment maintenance files
- Project management in pool/civil/mechanical and electrical related work
- Assist with the management of small scale projects
- Perform inspections and evaluations of buildings

To qualify, you must:

- Currently enrolled in a Mechanical, Electrical or Industrial Engineering Technology program
- Proficiency in Microsoft Office software
- Possess excellent organizational and communication skills
- Be a mature individual who can take direction and work well with minimal supervision
- Have a valid driver's license
- Current standard first aid with CPR an asset

The Engineering Assistant will provide engineering support to the Arenas and Pools Department. We are currently recruiting for 1 full time summer position; the pay for this position is \$16.00 -\$16.50 per hour and term is scheduled to begin as early as May and continue through until the end of August. Evening and weekend work may be required.

To ensure that we have all our staffing completed before the fast approaching summer, the deadline for applications is **February 24th, 2019**.
