

## MEDIA RELEASE

### *Residents asked to prepare for winter*

*For Immediate Release*

*Nov. 17, 2016*

QUISPAMSIS, NB – Winter is coming.

The Town of Quispamsis is asking its residents to take a few minutes to ensure their properties are ready for snow removal.

Rebar should not be placed along the travelled portion of the road. Basketball nets should be moved away from the end of all driveways.

“The safety of our snow-removal crews, and our residents, is paramount,” said Gary Losier, the town’s director of engineering and works.

“Rebar can become a dangerous projectile if clipped by a plow. If our residents are able to assist us now, it will help ensure everyone’s safety during winter storms.”
